EDENBRIDGE GRAMMAR
BEYOND SCHOOLING

Edenbridge Grammar

Parent Guide to Internet Safety, AI & Digital Learning

Our Approach to Digital Learning

At Edenbridge Grammar, digital learning is an essential part of modern education. We use technology, including AI-supported learning tools, to enhance teaching, personalise learning, and develop future-ready skills - while always prioritising **safety, wellbeing, and values**.

This guide explains how your child is protected online and how we work in partnership with families.

Secure AI Learning Platforms

All students have their own **secure login** to the school's AI-supported learning and mentoring platforms used for:

- Academic learning
- Quests and project-based work
- Reflection, feedback, and goal setting

These platforms:

- Operate within closed, protected systems - owned by Edenbridge
- Do not allow unrestricted internet browsing
- Are monitored for safeguarding and wellbeing
- Clearly communicated to you through your own access to your child's portal and through teacher /parent communication.

- Trigger alerts if concerning language or patterns appear. We will support you in dealing with matters as appropriate
- Are always overseen by trained staff

AI tools support learning but **never replace human judgement or care**.

Internet Access Beyond AI Platforms

Students may also use the wider internet for:

- Research and inquiry
- Creative projects
- Collaboration and innovation

To keep students safe without over-restricting learning:

- Educational web filters and content blocks are in place
- Age-inappropriate or harmful content is restricte
- Parental control measures are embedded in school systems
- Staff supervise and guide internet use during school time

Students are taught *how* to use the internet responsibly, not just what to avoid.

Creative Digital Opportunities

Your child may take part in activities such as:

- Building websites or digital portfolios
- Creating podcasts or audio projects
- Producing educational videos or YouTube-style content
- Sharing learning through blogs or showcase

These activities are always:

- Educational in purpose
- Supervised by staff
- Approved through school processes
- Designed to protect student identity and privacy

Personal information is never shared publicly.

Safeguarding, Monitoring & Alerts

The school actively monitors digital activity on its platforms. If anything unsafe, concerning, or distressing is identified:

- Staff review the situation promptly
- Support is provided to the student
- Parents are informed where appropriate
- Further action is taken if needed

Safeguarding is proactive, not reactive.

Islamic Values and Digital Conduct

Digital learning at Edenbridge Grammar is rooted in Islamic values, including:

- Respect and dignity (Adab)
- Modesty and protection (Haya)
- Trust and responsibility (Amanah)
- Seeking beneficial knowledge (Ilm)

These values guide how technology is used and how students are supported.

How Parents Can Support at Home

We encourage parents to:

- Talk openly with children about online experiences
- Reinforce respectful and responsible digital behaviour
- Monitor internet use at home where possible
- Contact the school with any concerns or questions

Safeguarding works best when school and home work together.

Our Commitment to You

Edenbridge Grammar is committed to:

- Transparency in digital practice
- Strong safeguarding systems
- Ethical and values-led technology use
- Partnership with families

Your child's safety and wellbeing always come first
